

BIG LUG

DUMP TRAILERS

SD SERIES DUMP TRAILER

BigLug SD offers slightly less payload capacity but packs just as much muscle as the BigLug HD. Extremely versatile, economical and built to strict engineering and manufacturing quality guidelines. BigLug SD is your essential jobsite companion – use it as an equipment trailer, material hauler, dumpster or dump truck. BigLug SD weighs less than the HD but it's no lightweight. Use it to transport everything from skid steers, lumber loads, and gravel to riding mowers, snow blowers and more. BigLug SD offers a low profile design (24" deck height) for safe and easy loading of equipment. Options include: Spare Tire Carrier & Tire, Roll Tarp, Hydraulic Jack, Extra Battery, Pallet Fork Carriers, Battery Charger and 24-Inch Side Extensions. When you need a dump trailer that can withstand almost anything you throw into it – go with the BigLug SD - it's a whole lot of trailer for a little price. Get the job done with BigLug.
